Lipodissolve Injections (Mesotherapy) Informed Consent Form

SINGLE SIGNATURE

BENEFITS OF LIPODISSOLVING INJECTIONS

1. Non-Invasive
2. Immediate results, but maximum results at 3 weeks
3. Destroys fat cells
4. No down time
5. Requires no anesthesia
6. Dissolve fat growths, such as lipoma
7. Help reduce cellulite
8. Permanent results with proper diet and exercise

LIPODISSOLVING INJECTION (Mesotherapy) is an injection of medication, homeopathic medicine, vitamins, plant extracts, or other substances directly into cells under the skin. Aesthetic Mesotherapy works by breaking up fat in cells that is then excreted through the body via the lymphatic system.

WHY TAKE LIPODISSOLVING INJECTIONS?

Lipodissolve Injection is a minimally invasive procedure that is a great alternative to surgical liposuction. Liposuction removes fat cells, while Mesotherapy removes fat from the fat cell. Patients experience minimal downtime, minimal bruising and pain, and can maintain results with proper nutrition and exercise.

WHAT COSMETIC CONCERNS DOES A LIPODISSOLVE PROCEDURE TREAT?

Abdominal Contour, Arm Shape & Size, Buttocks Shape & Size, Cellulite, Excess Body Fat, Leg Shape & Size, Neck & Jaw Definition.

CONTRAINDICATIONS AND WARNINGS

Patients with the following should not use Lipodissolving injections:

- Allergy to soy products
- Uncontrolled diabetes
- Pregnancy or breastfeeding
- Liver or kidney disease

- Hepatitis C/HIV
- Cancer
- Vascular complications
- Autoimmune disease

I acknowledge that I have read and understand the information above. I have had the opportunity to ask questions and consent to treatment.
