Informed Consent — Venus Legacy Treatment

SINGLE SIGNATURE

Patient Name _____

Treatment Area(s) _____

PROCEDURE DESCRIPTION

Venus Legacy is a non-invasive treatment using multi-polar radiofrequency and pulsed electromagnetic fields. It is designed to tighten the skin, improve circulation, stimulate collagen production, and promote lipolysis (fat breakdown).

EXPECTED BENEFITS

This treatment may improve skin laxity, reduce the appearance of cellulite, contour the body, and enhance overall skin texture. Some patients may notice temporary inch loss immediately after treatment due to increased circulation and lymphatic movement. Multiple sessions are required for optimal results.

RISKS & SIDE EFFECTS

Common side effects include redness, swelling (edema), warmth, tingling, and mild discomfort. These are typically temporary. Rare risks may include burns, blistering, or pigmentation changes.

ACKNOWLEDGMENT

I understand that results vary depending on individual factors including medical history, lifestyle, and compliance with treatment and aftercare instructions. No guarantees have been made regarding my results.

AFTERCARE RESPONSIBILITIES

I understand the importance of staying hydrated, maintaining a healthy lifestyle, and wearing recommended compression garments (such as a faja or waist trainer) to optimize results.

MEDICAL DISCLOSURE

I confirm that I have disclosed my full medical history and understand contraindications, including pregnancy or certain medical conditions.

PHOTOGRAPHY CONSENT

I consent to photographs for medical documentation, education, and marketing purposes, provided my identity is protected.

CONSENT

I have read and understand the information above. All questions have been answered to my satisfaction. I voluntarily consent to the Venus Legacy treatment.
